Poultry-houses, egg laying facilities, dairies and abbatoirs
- **Infrastructure Assessment and Rehabilitation Planning.**
- **Water Supply Projects:**  
Domestic and agricultural uses
- **Planning and Development of Agricultural Hubs.**
- **Feasibility Studies and Economic Assessments.**

# Our Projects

| Services Provided

## Livestock Projects

**Project Value:** US\$ 3.2 million

**Location:** KwaZulu Natal

Design, and construction of four (4) stock watering dams, eight (8) grazing camps, seventy-three (73) dip tanks and four (4) animal handling facilities, spread across the uMgungundlovu, Harry Gwala, uGu and iLembe District Municipalities.

## Irrigation Projects

**Project Value:** US\$ 1.5 million

**Location:** KwaZulu Natal

MBB provided professional services for ten (10) small irrigation projects. These involved the rehabilitation of existing farms, and complete infrastructure upgrades for various irrigation schemes (including drag-line/hop-along, center pivot, micro and drip irrigation).

## Eston Abattoir

**Project Value:** US\$ 0.9 million

**Location:** KwaZulu Natal

Infrastructure assessment of an existing facility. The design of a low throughput abattoir capable of processing 6 animal units per day, making allowance for future expansion. Prepared documentation and managed the procurement processes as well as construction administration and monitoring.

## Egglaying facility

**Project Value:** US\$ 0.5 million

**Location:** KwaZulu Natal

This project saw the expansion of Wagenbietjies farm, with the design and construction of eight (8) chicken laying houses, waste handling facilities and upgrading of the existing internal road network.
